FOR IMMEDIATE RELEASE

CLINICARE Announces Contract with the Town of Goderich, Ontario

Municipality Acquires EMR and PMA Solutions to Support Information Systems Needs in New Facility

CALGARY, Alberta May 1, 2005 – CLINICARE Corporation is pleased to announce the signing of a contract with the Town of Goderich to provide CLINICARE's award winning Electronic Medical Records (EMR) solution for the new Maitland Valley Medical Centre. The 14,000 square foot clinic is currently planned to accommodate the equivalent of 12 full time physicians, a minimum of two Nurse Practitioners and their support staff.

"Providing the people of our community with primary health care is essential to our community well being," said Deb Shewfelt, Mayor for the Town. "In partnership with the Board of the Alexandra Marine and General Hospital, we established a steering committee in 2002 to address the issue of physician shortages. The entire community has responded and the Town has funded the capital costs of the new \$4.6 MM facility which will open later this Spring. The Maitland Valley Medical Centre will be equipped with the latest in medical and information technology and will allow us to attract new physicians into our community."

"An EMR solution is critical for recruiting and retaining physicians in our community", said Dr. Sam Appavoo, lead physician on the EMR steering committee for the practice. "Our research over the past two years has clearly demonstrated to us that effective, responsive Practice Management Applications & EMR information systems are vital elements for quality patient care. As a result of a review over the past year of the EMR solution marketplace, it is apparent that CLINICARE is the leader in delivery of high quality EMR solutions backed by a strong customer support and service organization. We believe that the CLINICARE solution addresses the core requirements of enhancing physician productivity, patient care and collaboration."

Under the terms of this agreement, CLINICARE will implement its EMR solution commencing with hardware and network infrastructure. Change management consulting and training will commence in May and the first physicians are scheduled to go live in June, 2005. The server will be housed in the new facility and administered by clinic staff. Key to the decision to acquire the CLINICARE solution is the availability of an interface to the hospital MediTech information system. Once implemented later this year, this interface will provide lab results, discharge summaries and other information in electronic form right into the patient chart, thereby reducing the handling and the attendant delays associated with a paper based process.

"We are pleased that the Town and the new Maitland Valley Medical Centre have selected CLINICARE as their healthcare information technology partner", said Dennis Niebergal, president and CEO of CLINICARE. "In the past, our Customers have witnessed first hand that a '**Best in KLAS**' EMR solution not only provides enhanced physician productivity, but recent experiences indicate that there is a direct link between availability of EMR and physician recruiting success."

About CLINICARE

CLINICARE Corporation (www.clinicare.com) has specialized in software development for the ambulatory physician market since 1984. CLINICARE has received the 'Best in KLAS' Award two years in a row for being North America's highest rated Ambulatory EMR for groups of 6-25 physicians. CLINICARE received these Awards because of its software functionality that enables the delivery of high quality healthcare with enhanced patient safety while allowing physicians to practice medicine their own way. CLINICARE has branch offices in the United States and Canada, with its Head Office in Calgary, Alberta.
