CLINICARE's Electronic Medical Records - 3 Years at #1 in KLAS

CALGARY, Alberta, January 10, 2006 – CLINICARE Corporation of Calgary announces that their Electronic Medical Records (EMR) software, marketed by their US subsidiary, CHARTCARE, Inc. of Tacoma, WA, has been rated #1 in the Ambulatory EMR 6-25 Physicians category for the third straight year. KLAS Enterprises, LLC recently published the results of their 2005 '**Top 20 Best in KLAS Report**' that rates EMR providers on 40 criteria that cover quality, performance and business issues.

KLAS is the only research and consulting firm specializing in monitoring and reporting the performance of healthcare information technology (HIT) software vendors. The KLAS database reports vendor performance data from over 4500 healthcare facilities, 300 HIT vendors and 500 different products.

"Our Mission", states Adam Gale, VP of Operations at KLAS, "is to improve healthcare information technology (HIT) delivery, by independently measuring vendor performance for the benefit of consultants, investors, vendors and our healthcare provider partners. We commend CLINICARE on their consistent success, as determined by the most demanding critics of all - their own customers."

In the past two months, CLINICARE has received three of the most prestigious distinctions in the industry. Not only was CLINICARE again acknowledged as North America's #1 rated EMR by winning this '**Best in KLAS**' Award for the third consecutive year but they were also recognized at the inaugural event of the Canadian Health Informatics Awards Gala as the '**Company of the Year**' in addition to the industry's '**Corporate Citizen of the Year**'.

"These are incredible accomplishments and a credit to the commitment and hard work of the entire CLINICARE team", stated Dennis Niebergal, president & CEO. "Our employees share a dedication to Customer success and a commitment to innovation that matters. Physicians can make their decision to convert from paper charts knowing that CLINICARE provides a solution that is easy, innovative, trusted and affordable."

CLINICARE makes a difference in enhancing the quality of healthcare by providing medical practices with effective computerized information solutions with superior 'physician-driven' products backed by exceptional service. CLINICARE listens to and works closely with their Customers, Employees and Business Partners in a professional and positive manner.

About CLINICARE

CLINICARE Corporation (www.clinicare.com) has specialized in software development for the ambulatory physician market since 1984. CLINICARE was recently recognized as the Canadian Health Informatics 'Company of the Year' for 2005. CLINICARE has also received the 'Best in KLAS' Award three years in a row for being North America's highest rated Ambulatory EMR for groups of 6-25 physicians.

CLINICARE received these Awards because of its software functionality that enables the delivery of high quality healthcare with enhanced patient safety while allowing physicians to practice medicine their own way. CLINICARE has branch offices in the United States and Canada, with its Head Office in Calgary, Alberta.

About KLAS

KLAS Enterprises, LLC. (www.healthcomputing.com) has partnered with thousands of healthcare professionals (executives like CFOs and CIOs along with Directors, Managers and Clinicians) creating a dynamic database of performance information on Healthcare Information Technology software vendors. The KLAS database benefits all players in the healthcare market by reporting vendor performance data from over 4000 healthcare facilities, 300 HIT vendors and 500 different products. KLAS subscribers see the latest, most current performance information because the database is continually updated with reports from healthcare professionals across the U.S., Canada and selected countries around the world.

###

This press release may contain forward-looking statements, including those that may be related to revenue and net income that involve a number of risks and uncertainties. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are volume and timing of systems sales and installations; length of sales cycles and installation process; the possibility that the products will not achieve market acceptance; seasonal patterns of sales and customer buying behavior; the development by competitors of new or superior technologies; delays in product development; undetected errors or bugs in software; product liability; changing economic, political or regulatory influences in the health-care industry; changes in product-pricing policies; competitive pressures; general economic conditions.
