**CALGARY, Alberta**, July 29, 2008 – CLINICARE Corporation is pleased to announce that it now offers an integrated Medical Transcription Service to its Canadian Customer base. The service called **EMR-Scribe**, was first implemented at Lakeside Medical Clinic in Saskatoon earlier this month.

By utilizing digital technologies, CLINICARE is able to offer a reliable and efficient, high quality service with real cost savings. Trained by North American medical experts, our transcription professionals already cater to a wide range of health care facilities. Our digital technology platform ensures secure transmission of medical documents with a rapid turn-around time.

"CLINICARE is managed by an extremely responsive team that has systematically forged strategic relationships with key technology partners to maximize our value to our Customers," said Dennis Niebergal, CLINICARE's president and CEO. "We have integrated digital recording technology with a highly secure transmission process to provide customized services for our growing Customer base. We will service our transcription clients through a North American office with back up from sophisticated offshore operations."

With increased connectivity speed and access, medical practices can utilize economies of scale and provide a cost reduced component to their business. Outsourcing some services can mean a reduction in administrative burdens and fixed costs. Outsourcing Document Management services allows CLINICARE Customers to reduce overhead and other administrative costs and may possibly even improve the quality of the Electronic Medical Record.

Physicians and office staff are freed from typing and editing chores, allowing them to focus on patient care. With our tailored technology, CLINICARE EMR users now have an unparalleled ease-of-use and productivity at a fraction of the cost of creating documentation locally.

Customers interested in learning more about **EMR-Scribe** can contact their Account Representative.

## About CLINICARE

CLINICARE Corporation ([www.clinicare.com](http://www.clinicare.com)) has specialized in software development for the ambulatory physician market since 1984. CLINICARE is Canada's leading provider of Electronic Medical Records (EMR) and Practice Management Applications (PMA). CLINICARE's EMR has been rated as one of the Top 2 EMRs in North America for the past 5 consecutive years by the prestigious IT consulting firm - KLAS Enterprises. CLINICARE has also been recognized in recent years by the Canadian Health Informatics Association by being bestowed the "Company of the Year", "Corporate Citizen of the Year" and "Healthcare Transformation of the Year" Awards. CLINICARE is the only vendor to have received this recognition. CLINICARE is also one of the successful proponents to BC's Physician Information Technology Office (PITO) initiative. CLINICARE has branch offices in the United States and Canada, with its Head Office in Calgary, Alberta.

This press release may contain forward-looking statements, including those that may be related to revenue and net income that involve a number of risks and uncertainties. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are volume and timing of systems sales and installations; length of sales cycles and installation process; the possibility that the products will not achieve market acceptance; seasonal patterns of sales and customer buying behavior; the development by competitors of new or superior technologies; delays in product development; undetected errors or bugs in software; product liability; changing economic, political or regulatory influences in the health-care industry; changes in product-pricing policies; competitive pressures; general economic conditions.
